

# MicroBooNE Analysis Tools kick-off Team Meeting

6-June-2013

- We propose this meeting once/week. All interested MicroBoone collaborators subscribed to [microboone\\_analysis\\_tools@fnal.gov](mailto:microboone_analysis_tools@fnal.gov) are invited (subsequently). Thursdays, 9:30 okay?
  - Do we need to re-open doodle poll?
- [http://www-microboone.fnal.gov/at\\_work/AnalysisTools/](http://www-microboone.fnal.gov/at_work/AnalysisTools/)
  
- Not expecting everyone to have a meeting. Leave it to subconveners to have meetings or not. (Some groups consist strictly of the subconveners.)
  - (Not entirely clear how/if other LArSoft mtgs go on, unperturbed by all the MicroBooNE-focused effort)
- Our meetings will have rather informal agendas: Will go around the table and hope people will be prepared to say what's going on in your group

- Database and software tools people may need to get in touch with particular FIFE people
- Expecting everyone in room to contribute to Recon, especially all algorithm authors. We know there is a lot of energy here currently.
  - One working First Plots list is at docdb2437, slide33.
  - Also: as we've stressed before we don't want to inhibit any other parallel self-organization that's going on.
- We'll follow up over time to be sure everyone is in agreement with your charge.
  - [http://www-microboone.fnal.gov/at\\_work/AnalysisTools/analysis\\_tools\\_org.txt](http://www-microboone.fnal.gov/at_work/AnalysisTools/analysis_tools_org.txt) are the job descriptions, many are very specific things which need doing, some are vaguer.
