

DocDB Support Agreement
between Fermilab Computing Division
and the MicroBooNE Collaboration
January 12, 2009

This document defines an agreement between the Office of Program Support (PS) Group and Lab and Scientific Core Services (LSC) Department in the Fermilab Computing Division (CD) and the MicroBooNE Collaboration. PS and LSC agree to host documents for the MicroBooNE Collaboration on the DocDB web server (www-docdb.fnal.gov). As part of this agreement, the following will be provided for the duration of use of DocDB by CD.

1. an alias on the DocDB server, microboone-docdb.fnal.gov
2. a DocDB home page for the group or experiment
3. a backup of the database (PS: daily backups; LSC will back up our dump files).
4. a standard header and footer based on the current collaboration/project website.
5. A backup of all components of DocDB (PS – cron scripts back up MySQL database; LSC– back up all content on www-docdb.fnal.gov).
6. Problem reporting for users via helpdesk tickets (helpdesk.fnal.gov or email helpdesk@fnal.gov).

Requests for additional features or changes to DocDB should be submitted to docdb-adm@fnal.gov. Such requests will be reviewed and depending on the availability of resources and the feasibility of the requested change/s, will be added to this document.

If DocDB use is discontinued in favor of another application, CD will assist in migrating the data to this new application or will provide the raw data for MicroBooNE to import into the program of its choice.
