[About DocDB](#)

Document Management: (Which option do I choose?)

- [Create a new](#) document from file(s) on your **local computer**
- [Create a new](#) document from file(s) on the **web**
- [Reserve](#) a document number (if you don't yet have a draft of your document).
- [Update](#) document #
- [Update DB Info](#) for document #
- [Add](#) file(s) to document #

Event Management

- [Create](#) a new event with multiple sessions
- [Create](#) a new event with only one session
- [Create](#) an externally managed event (e. g. a conference)
- Modify an [existing event](#) (choose event on next page)

Database maintenance:

- Add an [author](#)

2

Add Authors

You are about to add an author to the MicroBooNE document database. Anyone is allowed to add authors. Please be careful and make sure to put the authors first name, last name, and middle initials (with periods) in the right place. If you make a mistake, **DO NOT** enter the author again. Contact an [adminstrator](#) and explain the problem. Required fields are denoted by *. Click any **highlighted link** for quick help.

Institution: *
