# Larsoft News

- Weekly larsoft integration release v02\_05\_03 will use current art version.
- Larsoft v02\_06\_01 will be based on same larsoft tag as v02\_05\_03, and will update art version.
  - Art v1\_09\_04 → art v1\_11\_02.
  - gcc 4.8.2 → 4.9.1 (c++11 → c++14).
  - Ups compiler qualifier e5 → e6.
    - `setup larsoft v02_06_01 -q e6:prof`
- We want to update to art v1\_11\_xx to use new sam features added in art.
  - We would have updated art version earlier, except we delayed updating until after mcc5 was launched.
